

This is Veoneer Safety Systems

veoneer

Veoneer Safety Systems

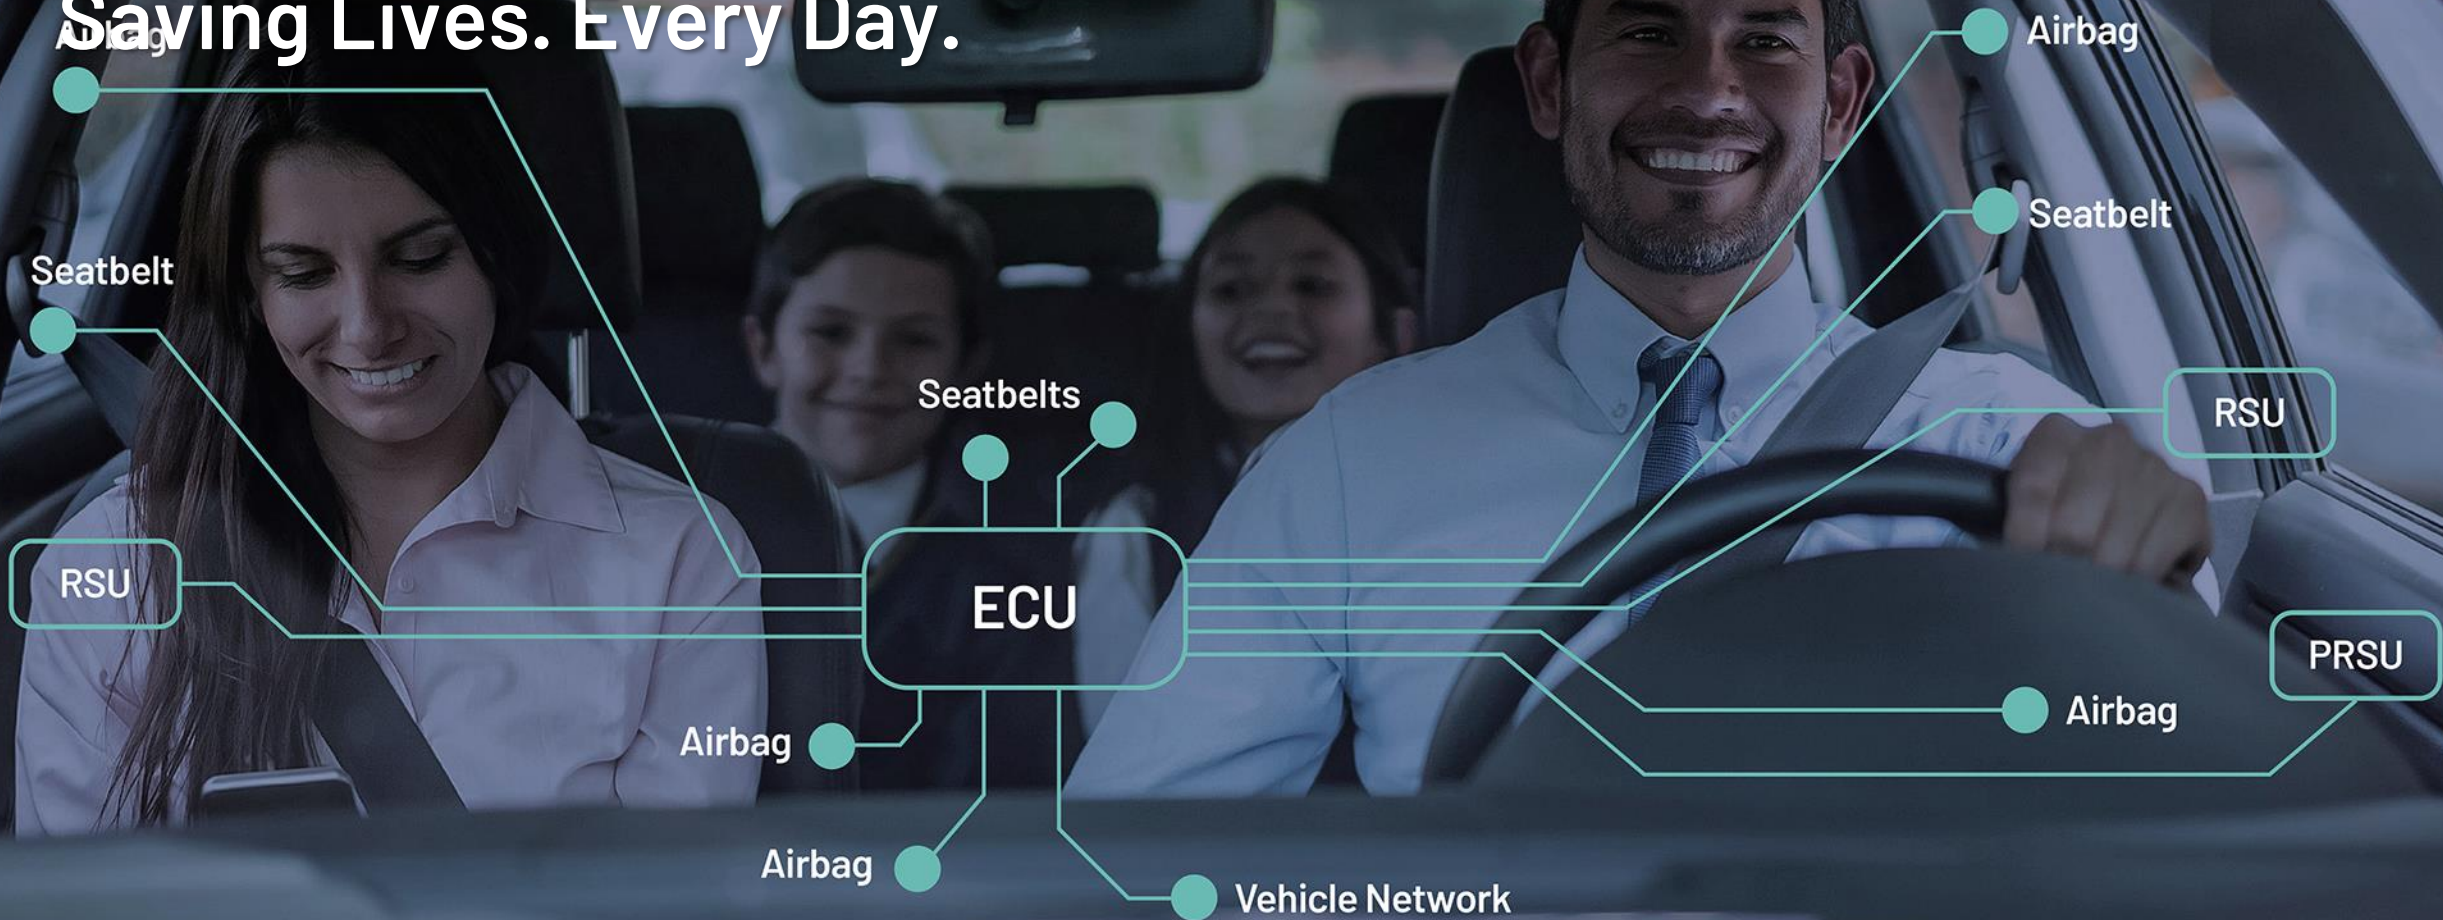

- **The World Leader** in Automotive Electronics Safety Systems
- Our state-of-the art Restraint Control Systems are **saving lives** by mitigating the effects of a car crash.
- **Every 4th car** built today has Veoneer's Restraint Control Systems
- **2,700** associates
- Presence in **11 countries**
- History of 70 years of automotive safety development

Global Footprint

Saving Lives. Every Day.

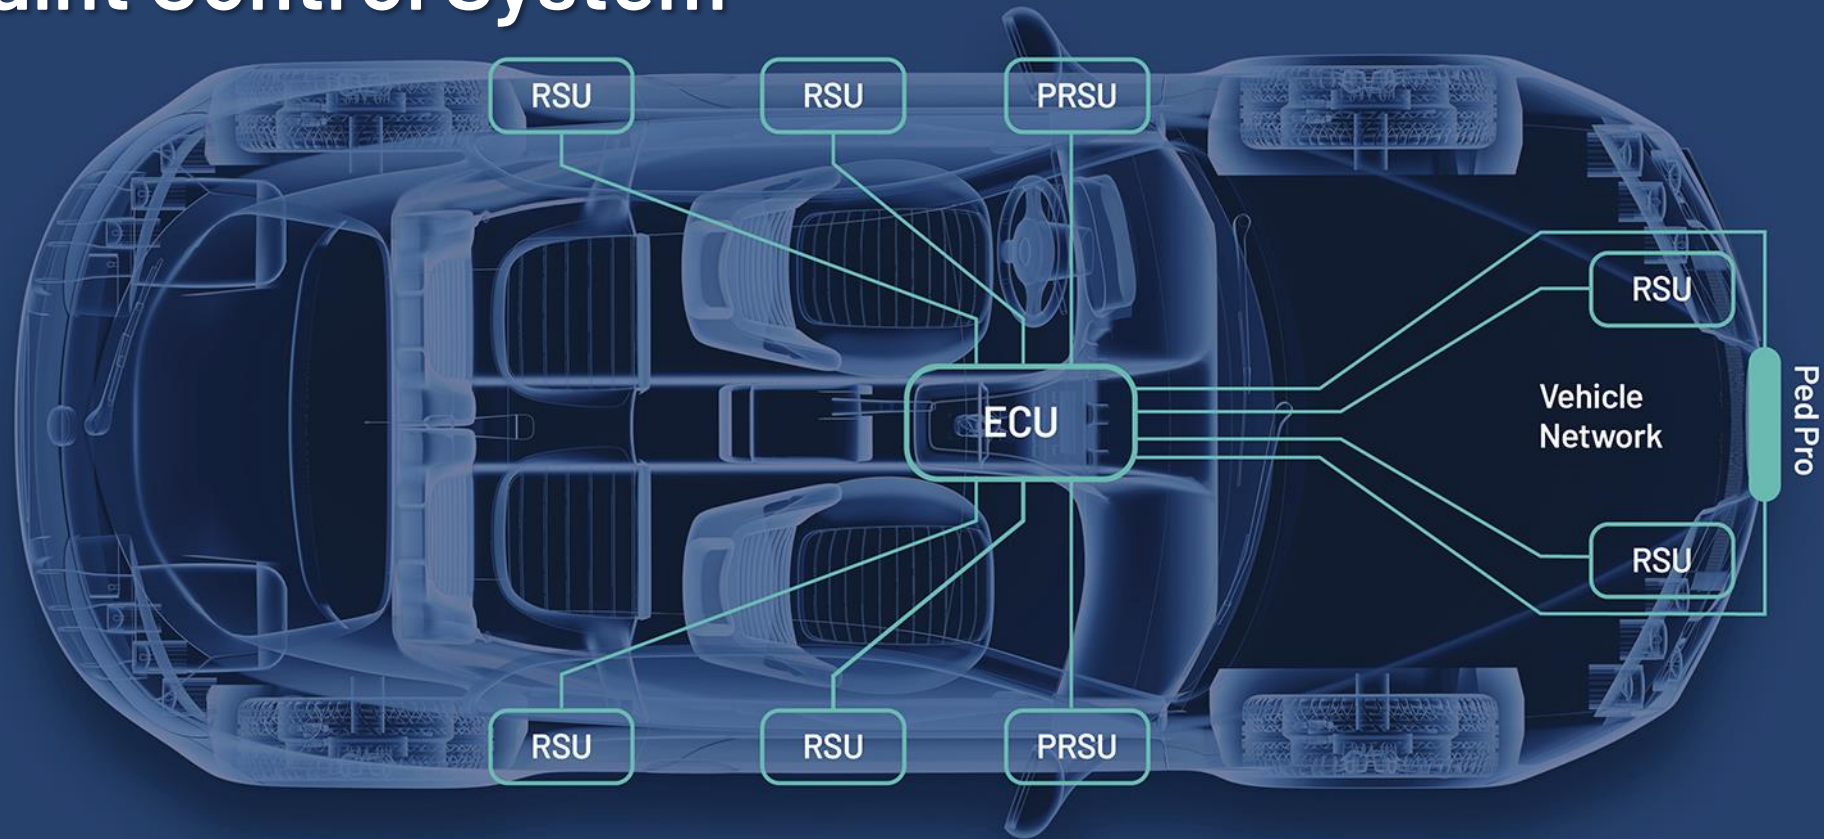

The World Leader

- More than **1 billion Electronic Control Units** and crash sensors delivered to car manufacturers globally.
- And we are growing...
- In 2023, our products are part of around **40 vehicle launches**.

Restraint Control System

Individual Products

- RCS Electronic Control Units (ECU)
- RCS Inertial Measurement Unit (IMU)
- Remote Sensing Unit (RSU)
- Pressure-Based Remote Sensor Unit (PRSU)
- Pressure Tube Assembly (PTA)
- Electronics for Motorized Seatbelt

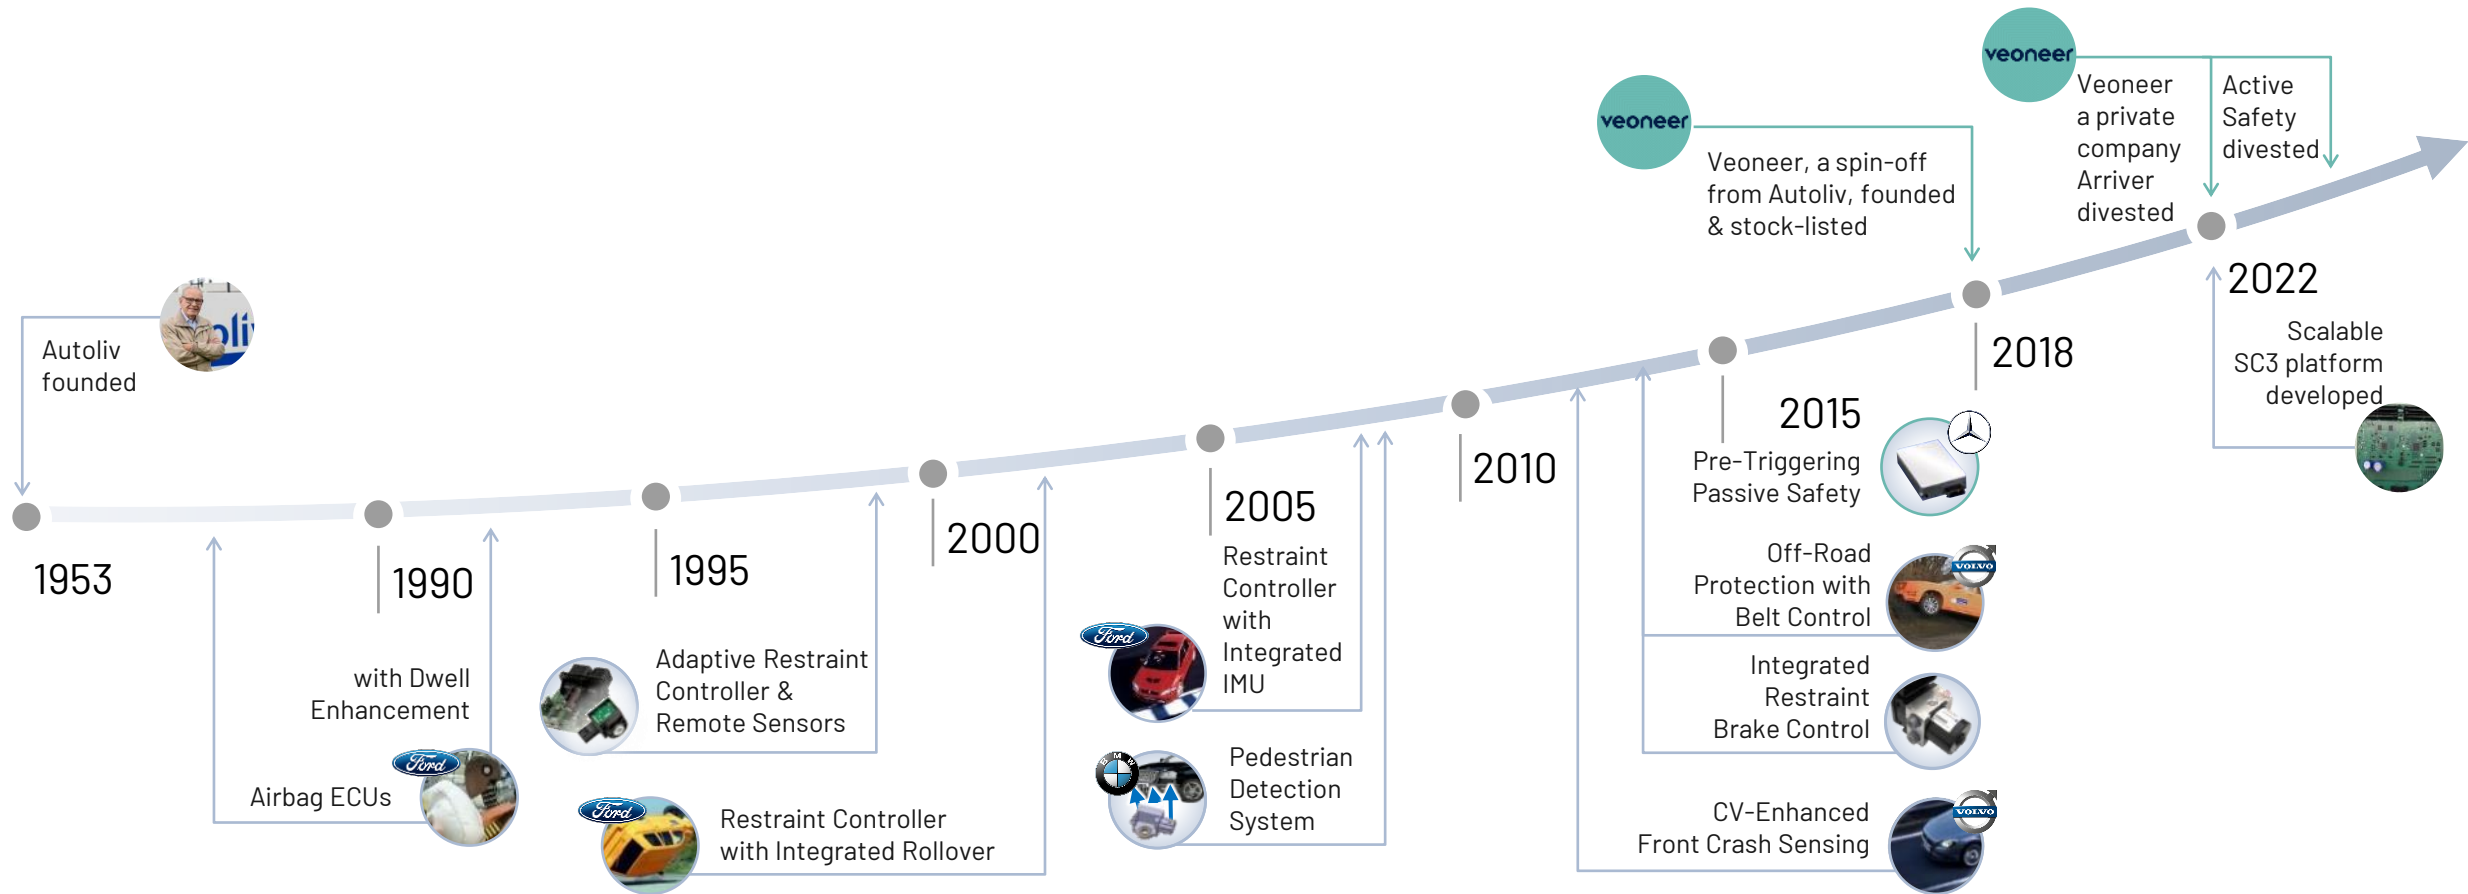

SC3 Platform

- Basis for **standardized** off-the-shelf products
- **Scalable** from low to high-end.
- **Highly tailored chipset including;**
 - A scalable family of microcontrollers.
 - Software based on our extensive experience in the RCS domain.
 - New mechanical design with manufacturing standardization
 - The latest versions of our two high performance families of crash algorithms.
- **Commercial success** – major awards with multiple OEMs.

Heritage of 70 years of Automotive Safety Development

Highest Ethics**

Our Roadmap to Carbon Neutrality

An aerial photograph of a multi-lane road curving through a lush green landscape. A small car is visible on the road. Four dark blue callout boxes with white text are positioned along the road, each connected to the road by a thin white line. The boxes represent milestones in the company's carbon neutrality roadmap.

2025

**15% Reduction of
Carbon Emissions**

Scope 1&2 carbon emissions

2030

**Carbon Neutral
Operations**

2039

**Carbon Neutral
Products**

From sourcing to
disposal

2040

**Carbon Neutral
Company**
